Howard Johnson

DevOps / Operations Engineer

Kingston, Jamaica · 876-567-1320 · hjohnson.enquiries@gmail.com · github.com/HBPanda · hbpanda.github.io

SUMMARY

DevOps and operations engineer who builds, ships and runs containerized platforms end to end. I work across Azure and Kubernetes (AKS, k3s) along with Prometheus/Grafana observability. I bring a full-stack development background in C#/C++/.NET, PHP/Laravel, Python and React, and run an independent consulting practice delivering web projects.

SKILLS

Cloud & containers	Azure (AKS, App Configuration), Kubernetes (AKS, k3s), Docker, Docker Compose
Observability	Prometheus, Grafana, Blackbox Exporter, Discord/webhook alerting
Systems & networking	Linux (Ubuntu, RHEL), Caddy reverse proxy, TLS/PKI troubleshooting
Scripting & languages	Bash, PowerShell, Python, TypeScript/JavaScript, C# .NET, PHP, SQL
Frameworks & data	FastAPI, React, Vue.js, Laravel, Spring Boot configuration, SQL Server, SQLite
AI & automation	LangGraph agent systems, agentic workflow design, automated test suites

EXPERIENCE

DevOps / Operations Engineer — Digicel Group

Nov 2020 – Present · Kingston, Jamaica

- Worked on a WireMock sidecar injection system on AKS, capturing microservice request/response chains with zero application code changes.
- Contributed to configuration management strategy for Spring Boot services on Kubernetes: XML hardening, schema validation, and a strangler-fig migration to database-backed config on Azure App Configuration.
- Delivered site monitoring for a RHEL 7.9 environment behind TLS inspection, packaging Prometheus, Grafana and Blackbox Exporter into a single containerized Alpine image.
- Wrote a PowerShell connectivity testing toolkit with INI/JSON configuration, parallel probing and structured output for repeatable network checks.

Earlier roles

- Customer Service Representative Assistant — Institute of Chartered Accountants of Jamaica, Kingston (Aug–Sep 2017)
- Help Desk Assistant / Bookkeeper — Electoral Office of Jamaica, Portmore (Aug–Sep 2016)

SELECTED PROJECTS

- **Asset forecasting service** (forecast.nautelos.dev) — FastAPI and React multi-asset price forecasting API with FRED macro data, economic calendar integration, Discord alerts, a permutation-tested backtester and a risk/position-sizing module.

WEBSITES CONTRIBUTED TO

- **Rehoboth Family Services** — rehobothfamilyservices.org · organisation website
- **S&G Global Pay** — staging.sgpayjamaica.com · payments platform (staging environment)
- **Obsidian Ridge** — obsidianridge.netlify.app · community site for a RedM roleplay server, with rules, jurisdiction map, roadmap and downloads

EDUCATION & CERTIFICATIONS

- **BSc Computing and Information Technology (Computer Science)** — University of Technology, Jamaica · In progress, expected 2027
- **Microsoft Azure track** — AZ-900 Azure Fundamentals (in progress) · AZ-104 Azure Administrator (pending) · AZ-400 DevOps Engineer Expert (pending)

LEADERSHIP & INTERESTS

- **SAPNA (UTech)** — Executive Project Manager (May 2018 – 2019), running agile delivery for student-led software projects; Recruitment Advisor (Sep 2018 – 2020).
- **Interests** — PC building, home networking and home lab hardware, chess, golf.
